

## Les Landes School Positive Mental Health Policy

UNCRC Article 3: Everyone who works with children should do what is best for each child

UNCRC Article 36: Every child has the right to be protected from things that could harm them

UNCRC Article 19: Every child has the right not to be harmed; they should be looked after and kept safe

### Policy Statement

*Mental health is a state of well-being in which every individual realises his or her own potential, can cope with the normal stresses of life, can work productively and fruitfully, and is able to make a contribution to her or his community.*

*(World Health Organization)*

It is widely recognised that children's emotional health and wellbeing, influences their cognitive development and learning, as well as their physical, social, health and mental wellbeing, into adulthood. At our school, we aim to promote positive mental health for every pupil and every member of our staff. We pursue this aim using both universal, whole school approaches and specialised, targeted approaches aimed at vulnerable pupils.

In addition to promoting positive mental health, we aim to recognise and respond to mental ill health. In an average classroom, three children will be suffering from a diagnosable mental health issue. By developing and implementing practical, relevant and effective mental health policies and procedures we can promote a safe and stable environment for children affected both directly, and indirectly by mental ill health.

### Scope

This document describes our school's approach to promoting positive mental health and wellbeing. This policy is intended as guidance for all staff including non-teaching staff.

This policy should be read in conjunction with our safeguarding policy in cases where a student's mental health overlaps with or is linked to a medical issue or a child protection issue, the SEN policy where a pupil has an identified special educational need, and the school's Counter-bullying policy where appropriate.

### The Policy Aims to:

- Promote positive mental health in all staff and pupils (Appendix D)
- Increase understanding and awareness of common mental health issues
- Alert staff to early warning signs of mental ill health and risk factors
- Provide support to staff working with young people with mental health issues
- Provide support to students suffering mental ill health and their peers and parents/carers

## **Lead Members of Staff**

Whilst all staff have a responsibility to promote the mental health of pupils. Staff with a specific, relevant remit include:

- Vicki Charlesworth, Headteacher - Designated Child Protection / Safeguarding Officer
- Claire McMenamin - Mental Health Lead/PSHE Lead/Mental health First Aider
- Angela Betts - Lead first aider
- Emma Le Monnier- Pastoral Lead/Mental Health Lead
- Fran Oxenden- ELSA
- Laura Webster - SENCo

Any member of staff or parent who is concerned about the mental health or wellbeing of a pupil should speak to the Class teacher/Mental health lead/Pastoral in the first instance. If there is a fear that the student is in danger of immediate harm, then the normal child protection procedures should be followed with an immediate referral to the designated child protection officer or the deputy / SENCo in her absence. If the pupil presents a medical emergency then the normal procedures for medical emergencies should be followed, including alerting the first aid staff and contacting the emergency services if necessary.

Where a referral to CAMHS is appropriate, this will be led and managed by Laura Webster as SENCo. Guidance about referring to CAMHS is provided in Appendix F. Half-termly meetings are held with the Primary Mental Health Worker from the Early Intervention CAMHS team.

## **Individual Care Plans**

At times, it may be helpful to draw up an individual care plan for pupils causing concern or who receive a diagnosis pertaining to their mental health. This should be drawn up involving the pupil, the parents and relevant health professionals. This may include:

- Summary of the Child's needs (All about Me)
- Strengths
- Likes/Dislikes
- Strategies to Support
- Key Adult
- Medication and any side effects

These are shared with staff and kept in the staffroom.

## **Curriculum and Teaching**

The skills, knowledge and understanding needed by our students to keep themselves and others physically and mentally healthy and safe are included as part of our developmental PSHE curriculum.

The specific content of lessons will be determined by the specific needs of the cohort we're teaching but there will always be an emphasis on enabling students to develop the skills, knowledge, understanding, language and confidence to seek help, as needed, for themselves or others.

We will follow the Jigsaw: Mindful Approach to PSHE<sup>1</sup> to ensure that we teach mental health and emotional wellbeing issues in a safe and sensitive manner which helps rather than harms.

We have many ways of promoting positive mental health and wellbeing across the school. Some of these include:

- Enhancing school and classroom layout, facilities and resources to meet the needs of the children (eg. Focus boxes, stand-up desk etc.);
- Recognising the background and individual needs of each pupil;
- Daily check-ins with all pupils;
- Differentiated learning activities;
- Clear routines and expectations;
- Establishing positive relationships with children;
- Opportunities for reflection and spiritual development through creative subjects and the RE/PSHE curriculum;
- Consistent support for vulnerable children and those with SEN from teachers, teaching assistants and external agencies where appropriate;
- Recognising a range of teaching and learning styles and how this may support children's progress and development;
- Encouraging independence, self-confidence and resilience in their learning;
- Promoting a growth mindset;
- Regular assemblies linked to Mental Health and wellbeing;
- Support from Mental Health Lead/Mental Health First Aider (Children seek support by using the Time-to-Talk box);
- Access to Wellbeing room for children who need this support; and
- Access to Wellbeing chalet for parents, staff and pupils- located in private area of school grounds.

---

1

[www.gov.uk/government/guidance/child-adolescent-mental-health-service/pages/cypemotionalwellbeingandmentalhealthstrategy.aspx](http://www.gov.uk/government/guidance/child-adolescent-mental-health-service/pages/cypemotionalwellbeingandmentalhealthstrategy.aspx)

Pupils from UKS2 are invited to apply for the positions of Mental Health Ambassadors in school. They receive training from the Deputy Mental Health Lead, and are available at play-time and lunch-time to support and sign-post children.

### **Pupil Voice**

We believe that by involving children in decisions that impact them can benefit their emotional health and wellbeing by helping them to feel part of the school and wider community and to have some control over the lives. We want to empower our children to make decisions and to make healthy choices in their lives.

They will have opportunities to be involved in decision-making through Class Council and School Council. They will also have opportunities to join and lead groups, some of which may include P4C (Philosophy for Children) Group, Digital Leaders, Rights Respecting Team, Anti-Bullying Ambassadors and Mental Health Ambassadors.

### **Warning Signs**

School staff may become aware of warning signs which indicate a student is experiencing mental health or emotional wellbeing issues. These warning signs should **always** be taken seriously and staff observing any of these warning signs should communicate their concerns to either of the Mental health leads or Laura Webster SENCo in the first instance.

Possible warning signs include:

- Physical signs of harm that are repeated or appear non-accidental
- Changes in eating / sleeping habits
- Increased isolation from friends or family, becoming socially withdrawn
- Changes in activity and mood
- Lowering of academic achievement
- Talking or joking about self-harm or suicide
- Abusing drugs or alcohol
- Expressing feelings of failure, uselessness or loss of hope
- Changes in clothing - e.g. long sleeves in warm weather
- Secretive behaviour
- Skipping PE or getting changed secretly
- Lateness to or absence from school
- Repeated physical pain or nausea with no evident cause
- An increase in lateness or absenteeism

### **Managing disclosures**

A student may choose to disclose concerns about themselves or a friend to any member of staff so all staff need to know how to respond appropriately to a disclosure.

If a child chooses to disclose concerns about their own mental health or that of a friend to a member of staff, the member of staff's response should always be calm, supportive and non-judgemental.

Staff should listen, rather than advise and our first thoughts should be of the child's emotional and physical safety rather than of exploring 'Why?' For more information about how to handle mental health disclosures sensitively see appendix E.

All disclosures should be recorded in writing and held on the pupil's confidential file. This written record should include:

- Date
- The name of the member of staff to whom the disclosure was made
- Main points from the conversation
- Agreed next steps

This information should be shared with the Headteacher who will store the record appropriately and seek support and advice about next steps. See appendix F for guidance about making a referral to CAMHS.

### **Confidentiality**

We should be honest with regards to the issue of confidentiality. If we feel it is necessary for us to pass our concerns about a pupil on then we should discuss with the student:

- Who we are going to talk to;
- What we are going to tell them; and
- Why we need to tell them.

We should never share information about a student without first telling them. Ideally, we would receive their consent, though there are certain situations when information must always be shared with another member of staff and / or a parent. However, if staff perceive that a child is at immediate risk of harm advice can be sought from CAMHS without consent.

It is always advisable to share disclosures with a colleague, usually the mental health lead/SENCo/Pastoral Lead. This helps to safeguard our own emotional wellbeing as we are no longer solely responsible for the student, it ensures continuity of care in our absence and it provides an extra source of ideas and support. We should explain this to the pupil. If appropriate, and discuss with them who it would be most appropriate and helpful to share this information with.

Parents must always be informed if a referral is being made. We should always give pupils the option of us informing parents for them or with them.

If a child gives us reason to believe that there may be underlying child protection issues, parents should not be informed, but the designated safeguarding lead, Vicki Charlesworth must be informed immediately.

### **Signposting**

We will ensure that staff, students and parents are aware of sources of support within school and in the local community. The support available within our school and local community, is outlined in Appendix D.

We will display relevant sources of support in communal areas such as the dome and the outside display board and will regularly highlight sources of support to pupils within relevant parts of the curriculum. Whenever we highlight sources of support, we will increase the chance of pupil or parent help-seeking by ensuring families understand:

- What help is available
- Who it is aimed at
- How to access it
- Why to access it
- What is likely to happen next

### **Working with Parents**

We believe that our families play a key role in influencing children's emotional and mental health. We strive to establish good relationships with parents/carers, to build trust and to work effectively together. Where it is deemed appropriate to inform parents about a concern, we will endeavour to be sensitive in our approach. Before disclosing to parents, we should consider the following questions (on a case by case basis):

- Can the meeting happen face to face? This is preferable.
- Where should the meeting happen? At school, at their home or somewhere neutral?
- Who should be present? Consider parents, the student, other members of staff.
- What are the aims of the meeting?

It can be shocking and upsetting for parents to learn of their child's issues and many may respond with anger, fear or upset during the first conversation. We should be accepting of this (within reason) and give the parent time to reflect.

We should always highlight further sources of information and give them leaflets to take away where possible as they will often find it hard to take much in whilst coming to terms with the news that you're sharing. Sharing sources of further support aimed specifically at parents can also be helpful too e.g. parent helplines and forums.

We should always provide clear means of contacting us with further questions and consider booking in a follow up meeting or phone call right away as parents often have many questions as they process the information. Finish each meeting with agreed next step and always keep a brief record of the meeting on the child's confidential record.

Parents are often very welcoming of support and information from the school about supporting their children's emotional and mental health. In order to support parents we will:

- Highlight sources of information and support about common mental health issues on our school website;
- Ensure that all parents are aware of who to talk to, and how to get about this, if they have concerns about their own child or a friend of their child;
- Make our mental health policy easily accessible to parents, add it to our website;
- Share ideas about how parents can support positive mental health in their children through our regular information evenings; and
- Keep parents informed about the mental health topics their children are learning about in PSHE and share ideas for extending and exploring this learning at home.

### **Supporting Peers**

When a pupil is suffering from mental health issues, it can be a difficult time for their friends. Friends often want to support but do not know how. In the case of self-harm or eating disorders, it is possible that friends may learn unhealthy coping mechanisms from each other. In order to keep peers safe, we will consider on a case by case basis which friends may need additional support. Support will be provided either in one to one or group settings and will be guided by conversations by the student who is suffering and their parents with whom we will discuss:

- What it is helpful for friends to know and what they should not be told;
- How friends can best support;
- Things friends should avoid doing / saying which may inadvertently cause upset; and
- Warning signs that their friend help (e.g. signs of relapse).

Additionally, we will want to highlight with peers:

- Where and how to access support for themselves;
- Safe sources of further information about their friend's condition; and
- Healthy ways of coping with the difficult emotions they may be feeling.

### **Training**

As a minimum, all staff will receive regular training about recognising and responding to mental health issues as part of their regular child protection training in order to enable them to keep students safe.

We will provide links to relevant information in our staffroom for staff who wish to learn more about mental health. The [MindEd learning portal](http://www.minded.org.uk)<sup>2</sup> provides free online training suitable for staff wishing to know more about a specific issue.

Training opportunities for staff who require more in depth knowledge will be considered as part of our appraisal process and additional CPD will be supported throughout the year

---

<sup>2</sup> [www.minded.org.uk](http://www.minded.org.uk)

where it becomes appropriate due to developing situations with one or more students. This includes training a mental health first aider.

Where the need to do so becomes evident, we will host twilight training sessions for all staff to promote learning or understanding about specific issues related to mental health.

Suggestions for individual, group or whole school CPD should be discussed with a member of SMT who can also highlight sources of relevant training and support for individuals as needed.

### **Policy Review**

If you have a question or suggestion about improving this policy, this should be addressed to the Headteacher: [admin@leslandes.sch.je](mailto:admin@leslandes.sch.je). This policy will always be immediately updated to reflect personnel changes.

Review date: 2024

## Appendix A:

### Further information and sources of support about common mental health issues

#### Prevalence of Mental Health and Emotional Wellbeing Issues<sup>3</sup>

- Data from England shows that the number of children and young people aged 5-16 presenting with probable mental health disorders has risen from 1 in 9 in 2017 to 1 in 6 in 2021.
- Around half of all lifetime mental health problems start by age 14 and three-quarters by the mid-20s.
- The most recent survey by NHS Digital of children and young people's mental health in England, undertaken in October 2020 estimated that 1 in 6 children (16%) aged 5-16 years will have a probable mental disorder. This increased from 1 in 9 in 2017. Using this proportion (16%) and applying it to Jersey's estimated number of children aged 5 to 16 gives a total estimate of 2,250 children and young people with a probable mental health disorder.
- The same report states that 1 in 5 (20%) of those aged 17 to 22 were identified as having a probable mental disorder. Applying Jersey's population estimate to this % gives a total of 1,400 young people in Jersey aged 17 to 22 with a probable mental health disorder.

Below, we have sign-posted information and guidance about the issues most commonly seen in school-aged children. The links will take you through to the most relevant page of the listed website. Some pages are aimed primarily at parents but they are listed here because we think they are useful for school staff too.

Support on all of these issues can be accessed via [Young Minds](http://www.youngminds.org.uk) (www.youngminds.org.uk), [Mind](http://www.mind.org.uk) (www.mind.org.uk) and (for e-learning opportunities) [Minded](http://www.minded.org.uk) (www.minded.org.uk).

#### **Self-harm**

Self-harm describes any behaviour where a young person causes harm to themselves in order to cope with thoughts, feelings or experiences they are not able to manage in any other way. It most frequently takes the form of cutting, burning or non-lethal overdoses in adolescents, while younger children and young people with special needs are more likely to pick or scratch at wounds, pull out their hair or bang or bruise themselves.

### **Depression**

Ups and downs are a normal part of life for all of us, but for someone who is suffering from depression these ups and downs may be more extreme. Feelings of failure, hopelessness, numbness or sadness may invade their day-to-day life over an extended period of weeks or months, and have a significant impact on their behaviour and ability and motivation to engage in day-to-day activities.

### **Anxiety, panic attacks and phobias**

Anxiety can take many forms in children and young people, and it is something that each of us experiences at low levels as part of normal life. When thoughts of anxiety, fear or panic are repeatedly present over several weeks or months and/or they are beginning to impact on a young person's ability to access or enjoy day-to-day life, intervention is needed.

Carol Fitzpatrick (2015) *A Short Introduction to Helping Young People Manage Anxiety*. London: Jessica Kingsley Publishers

### **Obsessions and compulsions**

Obsessions describe intrusive thoughts or feelings that enter our minds which are disturbing or upsetting; compulsions are the behaviours we carry out in order to manage those thoughts or feelings. For example, a young person may be constantly worried that their house will burn down if they don't turn off all switches before leaving the house. They may respond to these thoughts by repeatedly checking switches, perhaps returning home several times to do so. Obsessive compulsive disorder (OCD) can take many forms - it is not just about cleaning and checking.

### **Suicidal feelings**

Young people may experience complicated thoughts and feelings about wanting to end their own lives. Some young people never act on these feelings though they may openly discuss and explore them, while other young people die suddenly from suicide apparently out of the blue.

### **Eating problems**

Food, weight and shape may be used as a way of coping with, or communicating about, difficult thoughts, feelings and behaviours that a young person experiences day to day. Some young people develop eating disorders such as anorexia (where food intake is

restricted), binge eating disorder and bulimia nervosa (a cycle of bingeing and purging). Other young people, particularly those of primary or preschool age, may develop problematic behaviours around food including refusing to eat in certain situations or with certain people. This can be a way of communicating messages the child does not have the words to convey.

## Appendix C: Data Sources

[Children and young people's mental health and wellbeing profiling tool](#) collates and analyses a wide range of publically available data on risk, prevalence and detail (including cost data) on those services that support children with, or vulnerable to, mental illness. It enables benchmarking of data between areas

[ChiMat school health hub](#) provides access to resources relating to the commissioning and delivery of health services for school children and young people and its associated good practice, including the new service offer for school nursing

[Health behaviour of school age children](#) is an international cross-sectional study that takes place in 43 countries and is concerned with the determinants of young people's health and wellbeing.

## **Appendix D: The Importance of Preventative Measures**

### **Sources or support at school and in the local community**

#### **School based support for staff**

What do we do to promote the positive well-being of staff?

- Opportunities to socialise outside of school
- Facilitate teamwork and support
- Supervision offered to all staff
- Timetabled opportunities to talk about pupils
- Non-judgemental approach
- Value opinions
- Back to work meeting
- Access to quiet space- chalet
- Access to Thrive App for support with Mental Wellbeing
- Access to Employee Assistance Programme (EAP), including counselling support and support regarding finances, consumer issues, housing and care of the elderly.
- Culture of collegiality
- Give staff time
- Respect confidentiality
- Professional culture of mutual respect
- Genuine community spirit valued

#### **School Based Support for children**

What do we do every day to promote the positive well-being of pupils?

- Greeting children as they arrive and leave
- Assemblies
- Range of communication methods between home and school
- Knowledge of families
- Growth Mindset
- Learning Partners
- Individual feedback
- Pupil conferencing
- Staff meeting time to discuss pupils
- Outdoor learning opportunities
- 'It takes a village to raise a child' philosophy
- Well-being room
- Time to talk with a number of adults
- Check-in and check out
- Anti-bullying ambassadors/ Mental Health Ambassadors
- Reduced timetable, alternative provision

### More structured sources of support at school - examples

What is it?	Who it is suitable for?	How it is accessed?	How this information is communicated to students / parents?
Well-being Team support	Children who need support with internalised behaviour	Through termly Planning and Review Meeting (PARM) with well-being facilitator	Consent letter from parents, conversation with SENCo
Children and Families Hub	Families who may benefit from a coordinated approach to meet their child's needs	Through SENCo	Meeting with parents and outside agencies
MLL support	Children new to the Island, with MLL to support transition	Through central MLL team	MLL team liaise with class teachers to communicate with parents
Well-being groups including Forest School, gardening, cooking	Children who need support with social and emotional development, or experiencing family changes	Through SENCo	Conversation with parents
Respite holiday care	To support families during school holidays	Through liaison with Kids Club and local charities or Pastoral Lead	Conversation with parents, meeting with agencies where appropriate

## **Local Support**

*There are many local support services or charities that might be accessed by school or by families, many of these have no cost. This list is by no means exhausted, but contains ones known to us.*

*The Jersey Online Directory [www.jod.je](http://www.jod.je) has details of how to access support groups, services, organisations and activities and includes a section dedicated to health and wellbeing. Other specific organisations are listed below:*

- *MIND Jersey*
- *Jersey Adult Mental Health Services (JAMHS)*
- *Jersey Talking Therapies*
- *Liberate*
- *NSPCC*
- *Samaritans*
- *Love Matters*
- *Freeda*
- *Childline*
- *Relate*
- *Parenting services*
- *Child and Adolescent Mental Health Services (CAMHS)*
- *Education Welfare Service*
- *Education Psychology*

## **Appendix E:**

### **Talking to students when they make mental health disclosures**

The advice below is from students themselves, in their own words, together with some additional ideas to help you in initial conversations with students when they disclose mental health concerns. This advice should be considered alongside relevant school policies on pastoral care and child protection and discussed with relevant colleagues as appropriate.

#### **Focus on listening**

*"She listened, and I mean REALLY listened. She didn't interrupt me or ask me to explain myself or anything, she just let me talk and talk and talk. I had been unsure about talking to anyone but I knew quite quickly that I'd chosen the right person to talk to and that it would be a turning point."*

If a student has come to you, it's because they trust you and feel a need to share their difficulties with someone. Let them talk. Ask occasional open questions if you need to in order to encourage them to keep exploring their feelings and opening up to you. Just letting them pour out what they're thinking will make a huge difference and marks a huge first step in recovery. Up until now they may not have admitted even to themselves that there is a problem.

#### **Don't talk too much**

*"Sometimes it's hard to explain what's going on in my head - it doesn't make a lot of sense and I've kind of gotten used to keeping myself to myself. But just 'cos I'm struggling to find the right words doesn't mean you should help me. Just keep quiet, I'll get there in the end."*

The student should be talking at least three quarters of the time. If that's not the case then you need to redress the balance. You are here to listen, not to talk. Sometimes the conversation may lapse into silence. Try not to give in to the urge to fill the gap, but rather wait until the student does so. This can often lead to them exploring their feelings more deeply. Of course, you should interject occasionally, perhaps with questions to the student to explore certain topics they've touched on more deeply, or to show that you understand and are supportive. Don't feel an urge to over-analyse the situation or try to offer answers. This all comes later. For now your role is simply one of supportive listener. So make sure you're listening!

#### **Don't pretend to understand**

*"I think that all teachers got taught on some course somewhere to say 'I understand how that must feel' the moment you open up. YOU DON'T - don't even pretend to, it's not helpful, it's insulting."*

The concept of a mental health difficulty such as an eating disorder or obsessive compulsive disorder (OCD) can seem completely alien if you've never experienced these difficulties first hand. You may find yourself wondering why on earth someone would do these things to themselves, but don't explore those feelings with the sufferer. Instead listen hard to what they're saying and encourage them to talk and you'll slowly start to understand what steps they might be ready to take in order to start making some changes.

### **Don't be afraid to make eye contact**

*"She was so disgusted by what I told her that she couldn't bear to look at me."*

It's important to try to maintain a natural level of eye contact (even if you have to think very hard about doing so and it doesn't feel natural to you at all). If you make too much eye contact, the student may interpret this as you staring at them. They may think that you are horrified about what they are saying or think they are a 'freak'. On the other hand, if you don't make eye contact at all then a student may interpret this as you being disgusted by them - to the extent that you can't bring yourself to look at them. Making an effort to maintain natural eye contact will convey a very positive message to the student.

### **Offer support**

*"I was worried how she'd react, but my Mum just listened then said 'How can I support you?' - no one had asked me that before and it made me realise that she cared. Between us we thought of some really practical things she could do to help me stop self-harming."*

Never leave this kind of conversation without agreeing next steps. These will be informed by your conversations with appropriate colleagues and the schools' policies on such issues. Whatever happens, you should have some form of next steps to carry out after the conversation because this will help the student to realise that you're working with them to move things forward.

### **Acknowledge how hard it is to discuss these issues**

*"Talking about my bingeing for the first time was the hardest thing I ever did. When I was done talking, my teacher looked me in the eye and said 'That must have been really tough' - he was right, it was, but it meant so much that he realised what a big deal it was for me."*

It can take a young person weeks or even months to admit they have a problem to themselves, let alone share that with anyone else. If a student chooses to confide in you,

you should feel proud and privileged that they have such a high level of trust in you. Acknowledging both how brave they have been, and how glad you are they chose to speak to you, conveys positive messages of support to the student.

### **Don't assume that an apparently negative response is actually a negative response**

*"The anorexic voice in my head was telling me to push help away so I was saying no. But there was a tiny part of me that wanted to get better. I just couldn't say it out loud or else I'd have to punish myself."*

Despite the fact that a student has confided in you, and may even have expressed a desire to get on top of their illness, that doesn't mean they'll readily accept help. The illness may ensure they resist any form of help for as long as they possibly can. Don't be offended or upset if your offers of help are met with anger, indifference or insolence, it's the illness talking, not the student.

### **Never break your promises**

*"Whatever you say you'll do you have to do or else the trust we've built in you will be smashed to smithereens. And never lie. Just be honest. If you're going to tell someone just be upfront about it, we can handle that, what we can't handle is having our trust broken."*

Above all else, a student wants to know they can trust you. That means if they want you to keep their issues confidential and you can't then you must be honest. Explain that, whilst you can't keep it a secret, you can ensure that it is handled within the school's policy of confidentiality and that only those who need to know about it in order to help will know about the situation. You can also be honest about the fact you don't have all the answers or aren't exactly sure what will happen next. Consider yourself the student's ally rather than their saviour and think about which next steps you can take together, always ensuring you follow relevant policies and consult appropriate colleagues.

## **Appendix F:**

### **What makes a good CAMHS referral?<sup>4</sup>**

If the referral is urgent it should be initiated by phone so that CAMHS can advise of best next steps

Before making the referral, have a clear outcome in mind, what do you want CAMHS to do? You might be looking for advice, strategies, support or a diagnosis for instance.

You must also be able to provide evidence to CAMHS about what intervention and support has been offered to the pupil by the school and the impact of this. CAMHS will always ask 'What have you tried?' so be prepared to supply relevant evidence, reports and records.

#### **General considerations**

- Have you met with the parent(s)/carer(s) and the referred child/children?
- Has the referral to CMHS been discussed with a parent / carer and the referred pupil?
- Has the pupil given consent for the referral?
- Has a parent / carer given consent for the referral?
- What are the parent/carers attitudes to the referral?

#### **Basic information**

- Is there a child protection plan in place?
- Is the child looked after?
- name and date of birth of referred child/children
- address and telephone number
- who has parental responsibility?
- surnames if different to child's
- GP details
- What is the ethnicity of the pupil / family.
- Will an interpreter be needed?
- Are there other agencies involved?

#### **Reason for referral**

- What are the specific difficulties that you want CAMHS to address?
- How long has this been a problem and why is the family seeking help now?
- Is the problem situation-specific or more generalised?
- Your understanding of the problem/issues involved.

---

<sup>4</sup> Adapted from Surrey and Border NHS Trust

### **Further helpful information**

- Who else is living at home and details of separated parents if appropriate?
- Name of school
- Who else has been or is professionally involved and in what capacity?
- Has there been any previous contact with our department?
- Has there been any previous contact with social services?
- Details of any known protective factors
- Any relevant history i.e. family, life events and/or developmental factors
- Are there any recent changes in the pupil's or family's life?
- Are there any known risks, to self, to others or to professionals?
- Is there a history of developmental delay e.g. speech and language delay
- Are there any symptoms of ADHD/ASD and if so have you talked to the Educational psychologist?
