

Vision

At Les Landes, we envision leveraging technology to foster an inclusive and dynamic learning environment that equips our children with the digital competencies essential for their future. Aligned with the Government of Jersey's Digital Education Strategy, our goal is to seamlessly integrate digital tools into our curriculum, enhancing educational experiences and outcomes. We are committed to ensuring equitable access to technology for all students, promoting responsible digital citizenship, and preparing our learners to thrive in an increasingly digital world.

At Les Landes we are committed to harnessing technology to enhance teaching and learning, ensuring our students develop the digital skills necessary for the future. Our digital strategy aims to provide a safe, inclusive, and innovative environment where technology supports creativity, collaboration, and critical thinking.

Key Objectives

1. Enhancing Learning and Teaching

- Integrate digital tools into the curriculum to support engagement and personalised learning.
- Use technology to develop problem-solving, computational thinking, and digital literacy.
- Provide staff with ongoing training to effectively use digital resources in the classroom.

2. Equitable Access and Inclusion

- Ensure all students have access to devices and digital resources.
- Promote assistive technologies to support pupils with additional learning needs.
- Address digital equity by providing resources for pupils with limited access at home, where resources allow.

3. Digital Citizenship and Online Safety

- Educate pupils on responsible and ethical use of technology.
- Implement a robust safeguarding policy to protect pupils online.
- Engage parents in digital literacy initiatives to support safe technology use at home.

4. Infrastructure and Innovation

- Maintain a reliable and secure IT infrastructure that supports teaching and learning.
- Invest in emerging technologies, such as interactive learning platforms and AI-assisted tools.
- Regularly review and update the digital strategy to reflect advancements in technology.

Implementation and Monitoring

The school's leadership team will oversee the implementation of this strategy, ensuring alignment with national and local education policies and continuous improvement. Regular feedback from staff, pupils, and parents will help refine our approach, ensuring technology remains a powerful enabler of learning at Les Landes.
